

## PACS Versatility Without Compromise

### Features

Developed for clinical and diagnostic applications, the PACStation-Mobile™ is the perfect system to implement in emergency and operating rooms where the need for PACS access is vital.

The PACStation-Mobile™ was developed with today's most advanced technology. Designed for ED physicians to have PACS access throughout their facility.

### Accessibility

The PACStation-Mobile™ brings PACS to the patient's bedside allowing the ED physician to share images instantly and discuss treatment while improving patient care.

### Wireless Induction Charging

Our partnership with Amico allows us to incorporate their patented, state of the art induction charging technology into the PACStation-Mobile™. This lets us seamlessly integrate the PACStation-Mobile™ into the working environment, providing physicians with mobility they have never had before, without having to worry about being attached to an outlet.

### Dual PACS & Dication Capable

The PACStation Mobile brings a truly multi-PACS solution to the ED. Our dual PACS system allows for instant access to 2 separate PACS systems. Whether it's Cardiology or Radiology the PACStation-Mobile™ has the access you need.

### Increase Patient Satisfaction

Bedside reads have been proven to increase patient satisfaction. With the PACStation-Mobile™, you will bring back the lightbox and show your patients the imaging they need to see.

### World-class support

Backed with an SMT Gold or Platinum service plan, you can rest easy knowing we've got you covered. Whether it's a hardware or software problem, SMT PACS engineers can help solve your issue.

### Specifications

**Cart:**  
Amico Hummingbird SM

**Internal Computing:**  
Nuc i5 Dual Band

**Memory:**  
16 GB 2133MHz DDR3

**Storage:**  
Samsung 850 EVO 250GB M.2

**Peripherals:**  
Antimicrobial liquid proof Mouse and Keyboard

**Video:**  
Dual Diagnostic Eizo 2 MP RX-250-BK Monitors

**Network Connections:**  
600mbps Wireless Adapter

**Charging:**  
Amico Wireless Induction Wall Outlet Mount Charger (as pictured below)
